Cohort Detail

NAME	YOE	CURRENT	PLANNED	PROPOSED	Δ CURRENT	Δ PLANNED
Provider 1	8.0	\$275,000	\$287,000	\$325,000	+\$50,000	+\$38,000
Provider 2	12.0	\$295,000	\$307,000	\$345,000	+\$50,000	+\$38,000
Provider 3	5.0	\$260,000	\$270,000	\$298,000	+\$38,000	+\$28,000

Market Range Exhibit

Logic & Empirical Rationale

- Internal equity: proposed salaries maintain YOE-based progression without inversions.
- External anchoring: proposed bases position providers within the p25–p75 market band.
- Targeted adjustment: focuses on mid-career providers where compression risk is highest.
- Compression guardrails: no cascade adjustments proposed at this time.

Governance Notes & Guardrails

- Proposed salaries do not create senior-junior inversions.
- All percentiles are from governance reference (post-annual-increase file).
- Percentiles are NOT FTE-adjusted — part-time lower percentile positioning is correct.
- Benchmark source: blended weighted-average of aggregated survey data (weighted by sample size).

Market percentiles are from published survey data; interpolated estimates are labeled as directional. Cost figures reflect base salary only unless otherwise noted. All data sourced from the most recent annual salary increases file and survey combined file. Generated 2026-08-08.
